

# Your **claims adjudicators** need a friend!

**Friendly**

Friendly is a robotic cognition platform for automating the tedious parts of the workers' compensation workflows. We help you **analyse medical, legal and claim documents**, find injury patterns, prevent fraud and make the right decision.

## Full medical analysis at your fingertips

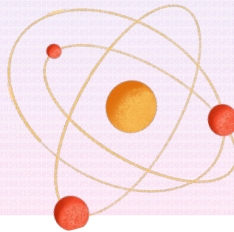

Friendly helps **expedite claim processing** by generating a medical history overview; ordered chronologically and grouped by:

-  History of illness & injury
-  Drug prescriptions, dosage and their trends
-  Reason → Diagnosis → Plan history from recent doctors' visits
-  Imaging, radiology & lab results
-  Medical procedures & equipment
-  Lifestyle, and non-medical risks

## 360° View

Contrast and compare what **patient** said, with the **company** line and the medical evidence from a **doctor**

Friendly helps your team automate the resolution of simple accident claims!

## Give your adjudicators efficiency superpowers!

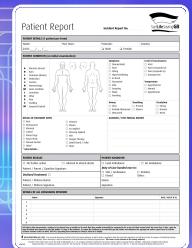

Process claims up to 80% faster with workflow automation.

Friendly automates digitalization of employee handbooks and compares contracted benefits with the information extracted from the medical evidence.

Arrive at the correct decision faster than ever!

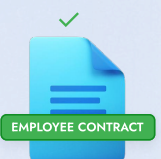

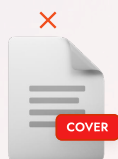

## Lightning fast

Digitize and analyze complex documents at **7000 pages per hour** at **95% accuracy**

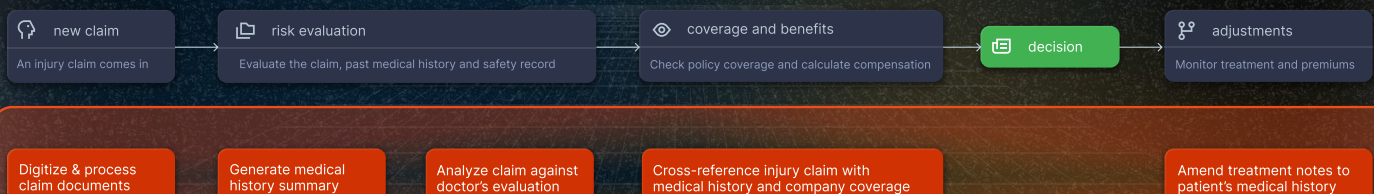

## Pay only for what you use

Don't pay for processing **empty, irrelevant, out-of-date** or **duplicate** pages

## Integrates into your workflow

**Let's be friends...**
