Your underwriters need a friend!

friendly

Friendly's robotic cognition platform for insurance providers helps **digitize** complex documents, **summarize** patient's medical history, and **automate** underwriting and claim workflows.

Medical summaries

Automatically generate case summaries.
You choose which content to include:

- **Cover page:** At-a-glace summary of applicant's vitals & health history

- **Medical overview**: Highlights notable impairments & abnormal lab results

- **Recent medication:** Categorized list of drug prescriptions and dosages

- **Impairments**: History of illnesses, diagnoses, and treatment

- **Rx→Diagnosis→Plan:** A timeline of doctor's visits, reasons and results

- **Test results:** Imaging, radiology and advanced medical test results

- **Lab results and trends**: graphs & charts of historical medical tests

- **Medical procedures & equipment** (pacemakers, wheelchair, etc)

- **Family history, lifestyle, and non-medical risks**

Leading accuracy

Automated AI digitization of complex medical and financial documents with **95%** accuracy across extracted data
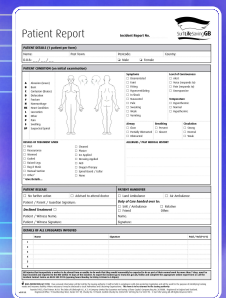

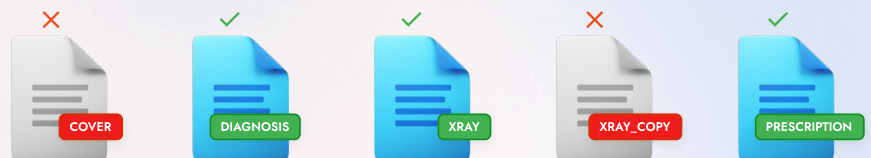

Focus on efficiency

Help your agents & underwriters become **much more efficient** by automating the boring busy-work

Lightning fast

Process complex documents at **7000 pages** per hour

Patient Report

Pay for what you use

✕	✓	✓	✕	✓
COVER	DIAGNOSIS	XRAY	XRAY_COPY	PRESCRIPTION

Don't pay for processing **empty**, **irrelevant** or **duplicate** pages
